Ever wanted to experience a simulated shuttle launch? See a Rocket launched? See John Glenn's Gemini launch site? Have lunch with an Astronaut? Walk under a real Saturn V Moon rocket? Visit the Smithsonian Air and Space Museum in Washington and see the Apollo 11 command module or a piece of moon rock? See the real mission control rooms at JPL and Houston and maybe see a Mars' rover at work?

Are you are interested in space and rocketry, then tours can comprise of visiting multiple NASA and affiliate sites within the USA. The Johnson Space Centre (Mission Control) in Houston, Kennedy Space Centre (KSC) at Cape Kennedy in Orlando Florida, fly in a shuttle simulator and see and tour the historic Mercury, Gemini and Apollo launch sites. Visit the Smithsonian Air and Space Museum in Washington DC, see the Wright Brother's plane, Enola Gay and the Space Shuttle Discovery and walk through Skylab. Visit Jet Propulsion Laboratory (JPL) in Pasadena, California, see actual size of Voyager, Galileo and Curiosity space craft and JPL mission control rooms.

This group voyage is fully escorted and offers time at the Johnson Space Centre in Houston with a level 9 tour, entry into KSC and go the "Early Space Tour" at Cape Canaveral, a full day at EPCOT in Disneyworld and also Universal Studios in Los Angeles. This voyage includes; 12 night's accommodation, group meals, all internal economy flights, taxes, transfers to and from venues and airports all entry fees. Participants will be limited and subject to flight and accommodation bookings at the time. Group usually consists of 10+ and more. See below example of full itinerary below, but can also be customised to suit.
